Bred for ease of transition as well as improved overseeding performance in value-oriented, lower-maintenance turf-type annual ryegrass that provides a dark color, fine leaf texture and compact growth. Suggested for lateral spread and fill-in. Mows cleanly and recovers well from traffic and heavy wear.

Blackstone exhibits a very dark green color and retains its color throughout the season. Excellent in fairway performance. Able to withstand heat, gray leaf spot, and pink snow mold.

Torsion was selected for improved turf quality and strong lateral spread ability. Torsion's aggressive tillering allows it to self-repair damaged turf. Torsion has excellent wear tolerance and a beautiful dark green color, making it an ideal choice for sports turf applications.

Big League was specifically selected for overseeding due to its rapid germination and quick establishment. Ideal for both cool-season and overseeding performance. Very dark green color and quick establishment and fill-in. Mows cleanly and recovers well from traffic and heavy wear.

Any variety with the A-LIST logo next to it denotes a variety that has been approved by the Alliance for Low Input Turf. This list includes products with a lower environmental impact and reduced labor requirements. The Alliance for Low Input Turf is a non-profit that promotes sustainable turfgrass management practices and products.
